### Scholarly & Creative Disciplines

Please use the following space to identify the two to three scholarly and/or artistic disciplines you plan to bring together in your minor. Please specify which medium(s) you plan to work in for your senior capstone and how you plan to develop the skills to do so (this may include coursework, extracurricular activity, etc.).

## Degree Requirements

To earn a Minor in Interdisciplinary Arts, students must complete at least 27 units of coursework in the program and a senior capstone. See [IAM webpage](#) for details.

### Foundation Course (3-4 Units)

The foundation requirement allows students to engage with theories of interdisciplinary art and creative research. Courses that meet this requirement will A) build students' competence and curiosity across an array of art forms and mediums through analysis and, potentially, creative practice; B) investigate art-making as a means of exploring and responding to non-art disciplines; and/or C) explore the intersection and multidirectional impact of new technologies and creative practice.

## Electives

The remaining units of the 27-unit minor must be satisfied by elective courses from at least two departments that encourage the interdisciplinary/intermedia ambition of the minor. To declare the minor, students must develop a coherent study plan of electives, focusing on one or two disciplinary intersections, so that the student is well-prepared to complete an interdisciplinary creative capstone in their senior year. All electives must be approved by the Faculty Director.
